

DEPUE MECHANICAL: BUILT TO SOLVE. TRUSTED TO DELIVER.

You've got systems to run and problems to solve. We make sure mechanical issues aren't one of them.

At DePue Mechanical, we bring industrial grit, engineering brainpower, and field-tested experience to every job.

Whether you're replacing boilers, installing piping, setting heavy equipment, or dealing with an HVAC meltdown, we don't show up with excuses—we show up with solutions.

We've been the go-to partner for plant managers, facility engineers, and GCs across the Illinois Valley and Chicagoland for a reason: we make your problems our problem.

WHAT WE DO BEST

Boiler & Code Welding

24/7 Emergency Service

Industrial Piping

Heavy Equipment Setting

Commercial HVAC

Sheet Metal & Skid Fabrication

Design & Prefab Services

CERTIFICATIONS & RECOGNITION

- TRMA Meritorious and Gold Award for Safety Excellence
- ASME Certified: R, U, and PP Stamps
- Local & Union-Trained Workforce with Decades of Experience

CERTIFIED WHERE IT COUNTS

We hold the ASME R, U, and PP stamps for pressure vessels and power piping—because code compliance isn't optional in the industries we serve.

HOW DO WE STACK UP?

Would you trust a contractor who outsources everything but the invoice?

Before you commit thousands in labor and material — use this checklist.

Key Criteria	DePue Mechanical	Contractor A	Contractor B
Emergency Response Time	Rapid + reliable, 24/7	Delayed weekends	Voicemail roulette
Certified Welders (R, U, PP Stamps)	Yes, in-house	Limited availability	Subcontracted
In-House Sheet Metal & Piping	Fully integrated	Outsourced	Basic fabrication only
Project Scheduling & Coordination	Proactive + transparent	Variable	Often reactive
CAD & BIM Capabilities	Fully integrated, in-house	Limited use	None or outsourced
Client Support	Dedicated point of contact	Rotating contacts	Call center only
Safety Record & Recognition	TRMA Award Winner	Meets minimums	Unknown record

Are you working with a contractor that can deliver like DePue?

Choosing wrong? Expect blown deadlines, subbed-out welders, and ghosted site visits.

CASE STUDY SNAPSHOT

Here's The Proof

When Henkel Chemical needed results under pressure, they called DePue Mechanical.

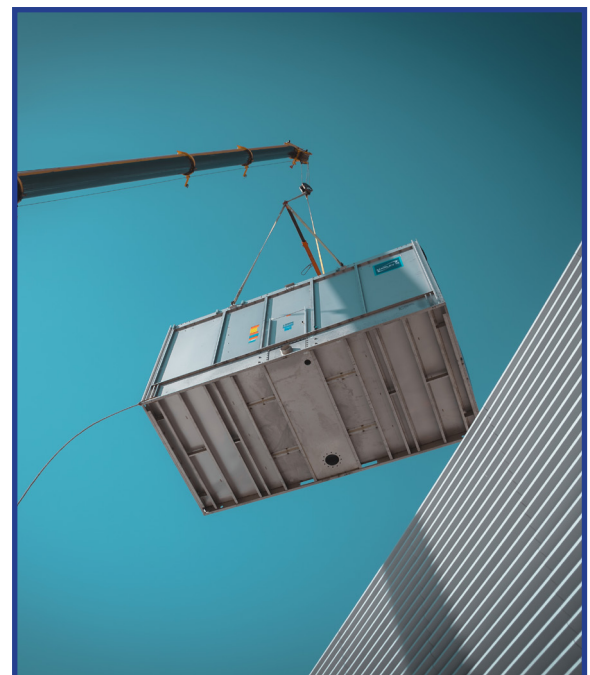

Challenge: Replace aging cooling towers during a tight plant shutdown

Solution: Full project execution (rigging, piping, QA) by DePue's in-house team

Results:

- ✓ Delivered on time and under budget
- ✓ Zero downtime
- ✓ Future capacity increased

Outcome: Job done right. No delays. No rework.

YOUR CONTRACTOR SCORECARD

What to Ask, What to Expect

Use this checklist to evaluate your current contractor—or prepare questions for your next bid walk.

Responsiveness & Availability

- Provides 24/7 emergency service with live response
- Can be onsite within 24–48 hours
- Offers same-day job walk-throughs when needed

Execution & Labor

- All welders are ASME R, U, and PP stamp certified
- All fabrication is performed in-house (not outsourced)
- Field crews are union-trained with site safety credentials
- Installs are completed with no punch list rework

Safety & Reputation

- TRMA or equivalent safety awards held
- Can provide recent references from similar facility types
- Has experience in facilities with CGMP or FDA/USDA compliance

Planning & Pre-Construction

- Delivers prefabrication and CAD/BIM files as part of submittals
- Coordinates directly with engineering and GC during preconstruction
- Offers value engineering suggestions to reduce timeline or cost

Project Management & Support

- Provides a dedicated project manager (not a rotating team)
- Communicates site updates before issues become problems
- Gives accurate manpower forecasting and daily job reports

If your current contractor isn't checking at least 6 of these boxes, it might be time to reassess.

Pro Tip: Ask, "Who's your R stamp holder?" If the answer is silence or subcontractors, start looking elsewhere.
